

Lumi Audio FLC-5 In-Ceiling Speaker

5.25" 2-Way Ceiling Speaker

The FLC-5 is a 2-way ceiling/wall speaker with a high quality 5.25" Polypropylene woofer and a 0.75" titanium dome tweeter in co-axial arrangement. It is designed for optimal performance in a wide variety of home entertainment applications, from providing relaxed background music to a high impact home theater system. This combination provides great flexibility in terms of application and suitability to different music tastes. Long life Kevlar® cone for a lifetime worth of listening enjoyment. The Kevlar® woven cone woofer with rubber surround delivers tight bass for extended listening sessions. The sophisticated crossover provides deep bass and exceptional top-end frequency response. Its frameless design makes installation easy and integrates perfectly with any decorative interior style.
