

Speaker Craft Profile A6 In-Ceiling Directional Speaker

It's been a dream of audio installers and interior designers for decades: a speaker that sounds terrific but disappears into the decor. The **Profile A6** is the realization of that dream—the speaker that pleases interior design aficionados every bit as much as it excites audio enthusiasts. Because the Profile A6 uses Speakercraft's flangeless design and can be painted to match the ceiling, it's almost invisible. It looks more like a shadow than a speaker. And while the listener's ear will definitely be drawn to the sound, the eye will wonder where it's coming from.

Specifications:

- Flangeless Appearance
- 6 1/2" Polypropylene Woofer with Rubber Surround
- Pivoting 1" Silk Tweeter
- **Woofer and Tweeter Baffle Fixed at 15 Degrees**
- Sensitivity: 92dB 1W/1m
