

Speaker Craft Profile AIM5 One In-Ceiling Directional Speaker

SpeakerCraft was formed thirty years ago by a group of dedicated individuals with a passion for sound. They've developed a brand based on the ever-expanding need for quality sound in the home. They proclaim their credentials today as the largest supplier of custom installed audio/video products in the world. They've manufactured and sold literally millions of loudspeakers.

SpeakerCraft's goal is to develop innovative designs that utilise state-of-the-art components and materials. Their efforts earn numerous industry awards for products that leap forward to bring tomorrow's technology today. They were first to invent in-wall speaker installation systems that don't require installing brackets, and they have greatly improved the high frequency response of in-ceiling speakers by inventing WavePlane™. They were first to introduce pivoting tweeters; on some of the latest models, even the whole speaker pivots whilst still remaining flush with the ceiling. These innovations help reduce the placement concerns of in-wall and in-ceiling speakers.

With SpeakerCraft you'll enjoy beautiful interiors without sacrificing sound or quality, and with the comfort of knowing that through Ceiling-Speakers.co.uk, their speakers carry a lifetime guarantee.

Specifications:

General Information

- Price per speaker: £169.00
- Speaker type: Mono
- Power type: Passive
- Enclosure type: Open design
- Back box available
- Guarantee period: Lifetime

Applications

- Bathrooms, Kitchen, Music, Home Cinema, Speakers for SONOS

Appearance

- Alignment with ceiling: Flat
- Visible shape: Circular
- Visible colour: White (Paintable)

Dimensions

- Overall diameter: 201mm
- Cutout diameter: 168mm
- Overall depth: 114mm
- Mounting depth: 114mm

Detailed Specifications

- Frequency range: 55hz - 20khz
- Impedance: 8 - 8 Ohms
- Compatible amplifier: 5 - 75 Watts RMS
- Sensitivity: 88dB

Speaker Driver Information

- Tweeter: 1 pivoting
- Bass: 1 pivoting (127mm)

Controls & Adjustments

Description:

The sleek Profile magnetic grille is now an option on many of Speakercraft's in-ceiling and in-wall models. Nothing changes but the grille. The sound is exactly the same, but there's no bezel and no visible mounting flange.

The Speakercraft tradition of innovative design combined with extensive engineering effort has led to the creation of the AIM series of fully directional in-ceiling loudspeakers. Each model can be entirely pivoted towards the listener whilst remaining discretely recessed behind a flush-mounted grille.

If the listening position changes, the speaker can be easily aimed in another direction with a simple push of the hand.

Speakercraft's innovation and excellence in engineering make the AIM series a range of exceptionally fine sounding speakers.

- Injection moulded polypropylene cone bass driver
- Treated silk dome tweeter
- Timbre-matched to all Speakercraft 'One' series speakers
