# IMPORTANT ADDITIONS TO THE SPEAKERCRAFT PROFILE SERIES

We have rounded out the SpeakerCraft Profile Series with six new models dealers have been requesting. With these new additions, our partners now have access to a complete line of In-Ceiling and In-Wall bezel-less/flangeless speakers that can be timbre-matched into virtually all residential audio applications—from whole home audio entertainment to heart-pounding home cinema.

SpeakerCraft Profile delivers the virtually invisible aesthetics demanded by today's discerning end-users and installers—matched to the finest driver materials and crossover networks for uncompromised sound quality and power handling in every residential application.

The two new LCR FIVE speakers deliver top-of-the-line performance with Kevlar woofers and aluminum/Magnesium dome tweeters. The new WIDE Series additions are ideal for side and rear channels, timbre-matched to existing ONE and THREE level speakers. And the AccuFit Ultra Slim ONE and THREE models provide two new solutions where shallow depth speakers are required.

## Profile AIM WIDE Series

The Profile AIM WIDE Series features fully pivoting woofers and unique dual midrange-tweeter module. The midrange-tweeter module is mounted directly over the woofer with dual, 2" dome midrange drivers and dual 1" tweeters facing 70 degrees off axis from each other. The result is ultra-wide sound dispersion with tremendous fidelity—the perfect design for home theater applications including side channels, rear channels, or height channels. They also perform equally well in multi-room general applications where ultra-wide dispersion is needed.

## Profile AIM LCR Series

The Profile AIM LCR Series was created to complement the trend of on-wall mounted flat panel television viewing and is the perfect addition either beside, above or below any flat panel display. They are an ideal choice in a multi-channel surround sound system for all channels when wanting identical performance from each of the in-wall surround sound channels. The Profile AIM LCR Series offers the ability to pivot the entire baffle, enabling the user to easily focus the sound into the primary listening area, creating a more realistic and enveloping sound stage.
