### Vibrant Display

**Samsung 55M5570 television** has a vivid wide screen that measures fifty five inches. It lets you see pictures that are vivid and realistic in its very appearance. It comes with a resolution of 1920 x 1080 pixels that makes images and videos come alive with perfect life like detailing. An advanced contrast enhancer makes you see images with more depth. It applies various levels of depth to different areas of the screen in order to bring flat images to life. It sports an ultra clean view feature that offers you higher quality images with less distortion. It has an advance algorithm that constantly analyses incoming pictures to upscale the image quality. A micro dimming technology lets you experience accurate shadow detail and colour. It divides the screen into zones and analyses each zone for deeper black tones and purer white hues.

### An Array Of Connectivity

This **Samsung 55M5570 television** comes with a bunch of connectivity options which will make you bask you in joy with its multiple possibilities. It comes with three HDMI ports that let you connects your gaming consoles for a fun gaming time. You can also connect BD players with ease. It features two USB ports that makes sure to keep you connected with external storage devices and many more. It also has an optical digital audio output along with a CI slot.

### Salient Features
